An environmental history of political ideas: epistemological and critical perspectives

The planetary crisis calls for a renewed understanding of political and social ideas. Far from being totally estranged to the material world, as ecological thought sometimes suggested, modern political ideas are full of prescriptions on how the land and the territory should be managed, and those prescriptions resonate in how freedom is understood and organised. In this talk, Pierre Charbonnier will develop some of the implications of his approach to the history of political ideas for contemporary critical thought.

RECORDINGS OF PAST LECTURES ON THE
[CSS YOUTUBE CHANNEL](#)

11th November 2021: Prof. Sabine Schlacke (German Advisory Council on Global Change - WBGU) „Beyond Climate Neutrality“

6th July 2021: Prof. Frank Biermann (Earth System Governance Project) „From Environmental Policy to Earth System Governance“

30th June 2021: Prof. Nigel Clark (Lancaster Environment Center) „Earthly Multitudes and the Challenge of a Self-Differentiating Planet“

Wednesday, 2nd February 2022
06:30 PM (Berlin time)
via Zoom Webinar
