Announcement - Master Thesis -

The Chair of Management and Sustainability offers the possibility to write a master thesis within the scope of a strategic research cooperation with the “Forum für Nachhaltige Geldanlagen” (FNG). Since 2001, the FNG is the industry association promoting sustainable investment. The quality assurance of sustainable investments is strongly increasing its importance and is part of GNG (subsidiary of FNG) tasks among others.

Short description of the proposed research:

The increasing demand for sustainable finance includes structured products. The analysis of the market for sustainable structured financial products is part of this master thesis. Thereby, an integration of the present “Sustainable Finance” EU discussion is important for the overall understanding of bystanders in the market. The presentation of structured products’ sustainable elements or characteristics will be the main contribution of this paper. The thesis may be written in English or German.

Requirements:

- Studies: MIBAS, business administration, economics (or a similar field of studies)
- Very good command of English (C1/C2)
- Experience in academic work and writing
- Interest in the topics of sustainability and finance
- Analytical thinking
- Ability to work independently

Timeframe:

Starting in winter 2019

We look forward to receiving your application. Please send your documents (short motivation letter, CV, most recent grades) via email to Simone Wagner. We are looking forward to further illustrating the proposal during the first stage of interviews.
