

At the Chair of Economics with a focus on Empirical Health Economics, we are seeking an enthusiastic

Student Assistant (m/f/d)

to support scientific research projects in the fields of labor economics and health economics starting as soon as possible.

Your tasks:

- Preparation and empirical analysis of data
- Assistance with data collection
- Various research activities

Your profile:

- Interest in empirical research
- Some experience with statistical software such as Python, R, or Stata
- Good communication skills, reliability, and accuracy

Additional assets:

- Advanced skills in Python
- Very good German language skills, both spoken and written

The working hours amount to 24 hours per month at a current hourly wage of 13.25 euros gross. The contract is limited to one year.

We offer:

- Flexible working hours and challenging teamwork
- Gain practical experience in empirical research and develop programming skills

To apply, please send your cover letter, CV, and academic transcripts to christian.zimpelmann@uni-hamburg.de by **Tuesday, December 3, 2024**.

If you are excited about contributing to impactful research in health and labor economics, we look forward to your application!

Jan Berendsen and Christian Zimpelmann

Chair of Economics with a focus on Empirical Health Economics
