

2nd WORKSHOP ON GEODATA IN ECONOMICS

CALL FOR PAPERS

16–17 May 2019 in Hamburg, Germany

The Universities of Hamburg, Hannover and Braunschweig are jointly organizing an international workshop on modern applications of geospatial data in economics. The workshop aims to provide a platform for young scientists to network, exchange ideas, and promote innovative research using nighttime lights and/or other geospatial data.

KEYNOTE SPEAKERS

DAVID WEIL (Brown University, NBER)

MAXIM L. PINKOVSKIY (New York FED)

The workshop will be held in an all plenary format. Each paper will be allocated 45 minutes, including the presentation, an assigned discussion, and a floor debate.

SUBMISSION

All papers should make use of geospatial data. Submissions from all fields of economics (e.g. development economics, regional or urban economics, environmental economics, or economic history) and related fields will be considered. We also encourage applications focusing directly on the properties of geospatial data, remote sensing and/or machine learning. Ph.D. students and young researchers (post-docs and APs) are particularly welcome to submit their latest research.

The deadline for submission of (preliminary) papers is **31 January 2019**. Both full papers and extended abstracts (min. 3 pages) will be considered.

Please submit your papers to workshop@lightinequality.com

CONFERENCE VENUE

Hamburg University,
Welckerstr. 8

ORGANISERS

Melanie Krause (Hamburg)
Richard Bluhm (Hannover)
Christian Lessmann
(Braunschweig)
