- Transformational experience: focus on ethical, environmental, social, institutional, and societal implications of business.
- Academically outstanding faculty with broad international experience.
- Vast range of options on offers at Universität Hamburg.
- Contact with leading companies and pioneering entrepreneurs in the area of sustainable business.

## PROFILE

MIBAS is an English-taught master's program designed to equip students with the extensive theoretical and practical knowledge necessary to master the challenges of sustainable and responsible management in business and society.

The profound theoretical and methodological knowledge acquired in MIBAS prepares students for challenging positions in multinational companies and international organisations. It also opens the door to an academic career for outstanding students wishing to pursue doctoral studies.

In MIBAS, students from different cultural backgrounds come together and develop a common understanding of the complex interrelations of global business.

The program focuses specifically on the ethical, environmental, social and political implications for today's business world. The MIBAS program offers a variety of subject options spread across six thematic areas and the final master's thesis.
