RE-THINKING ECONOMICS

Why is it that more and more international students are interested in a master's program in Economics at Universität Hamburg? Is it because of the range of choice and variety of topics that the WISO faculty has to offer? Is it the interdisciplinary collaboration with the unique program in **Politics, Economics and Philosophy (PEP)**? Is it the appeal of dealing with game theory, mathematical and empirical methods in small learning groups or is it the cosmopolitan harbor metropolis whose docks and terminals pulsate in the rhythm of global competition? There are many good reasons to study for a master's degree in Economics at the University of Hamburg. An attractive course of studies awaits you.
